

10th German-French Workshop on Oxide, Dielectric, and Laser Crystals 2021

September 16th-17th, 2021 - Idar-Oberstein (Germany)

Invitation to the
10th French-German Workshop on Oxide, Dielectric, and Laser Crystals 2021

at 16th and 17th of September 2021 in Idar-Oberstein
At: Berghotel Kristall, Wiesenstraße 50, 55743 Idar-Oberstein

Program:

Start: Thursday, 16.09.2021, 14:00; Dinner in the evening.

End: Friday, 17.09.2021, 13:00; with possibility to visit EOT

The present workshop is a continuation of the DGKK meetings on „Crystals for lasers and NLO“ and previous workshops organized at ISL in Saint Louis (2012, 2015), IKZ (2016,2020), ICMCB in Pessac/Bordeaux (2017), ILM in Villeurbanne/Lyon (2019) and EOT formerly FEE in Idar-Oberstein (2011, 2014, 2018)

The workshop is a collaboration of the German Society of Crystal Growth (DGKK), the CNRS network CRISTECH (Crystal Growth Technologies) and the French Committee for Crystal Growth (CFCC) and open for all members of universities, institutes and industry from all over the world to explore and discuss single crystal growth of inorganic materials, characterization methods and application, e.g. in the field of optics and piezoelectricity.

We encourage you to present your last results in an oral presentation (15 - 25 minutes plus 5 minutes for questions). Therefore, please send also the title and the list of authors in the commitment email. A one-page abstract for the abstract book is needed two weeks before the workshop. Ample time will be made available for discussions – especially during the legendary “Spießbraten” dinner offered in the evening. This time in the lovely “mountains” of Idar-Oberstein.

Please submit abstracts until August 31st, 2021 to: Dr. Sebastian Schwung (sschwung@eotech-de.com). The workshop attendance is free of charge. Due to the unclear pandemic situation, we cannot rule out a cancellation possible on short notice. However, we will make every effort to hold the workshop under appropriate hygiene measures. We will keep you informed from August onwards about any changes to the schedule due to amended official measures.

Looking forward to an interesting workshop,
Dr. Sebastian Schwung

(*) Please forward this information to potentially interested colleagues not included in the distribution list.

10th German-French Workshop on Oxide, Dielectric, and Laser Crystals 2021

September 16th-17th, 2021 - Idar-Oberstein (Germany)
